

HCIA-Cloud Computing V5.5 Change Instructions

Version	Date	Instruction
V5.0	September 14, 2022	Enable V5.0 training materials, lab guidebooks and exam questions
V5.5	October 31, 2023	Enable V5.5 training materials, lab guidebooks and exam questions V5.0 was released on September 14, 2022, and V5.0 will become unavailable from July 30, 2024. The old and new versions coexist for 9 months.

This document is applicable to the version refreshed certification product. It is used to compare the new and old version of the training materials, lab manuals and detailed changes of the test. It is necessary to specify the contents of the addition, deletion or optimization of the knowledge points and their proportions.

1. Training material change instructions

In the PPT unit, each training material needs to Added a page of training material change instructions to introduce the material change point (optimization, addition or deletion) relative to the old material.

Chapter	V5.0	V5.5	Change Instructions
1.Cloud Computing Basics	5%	5%	Update the overview of cloud computing, 50%
2.Server Basics	2%	2%	Update server basics, 30%
3.Storage Technology Basics	5%	5%	Update storage technology basics, 10%
4.Network Technology Basics	10%	10%	
5.Operating System Basics	3%	3%	
6.Virtualization	10%	10%	Update virtualization technology, 30%
7.Huawei Virtualization Platform	10%	7%	Update the introduction to FusionCompute and replaced it with 8.3.0, 30%
8.Huawei Virtualization Platform Management and Usage	20%	23%	Add FusionCompute O&M, 5% Update the introduction to FusionCompute and replaced it with 8.3.0, 30%
9.Overview of FusionAccess	5%	5%	Update the introduction to FusionAccess, 50%
10.Planning and Deployment of FusionAccess	10%	7%	Update the FusionAccess planning, 30%

11.Service Provisioning of FusionAccess	10%	10%	Update the FusionAccess service provisioning, 30%
12.Features and Management of FusionAccess	5%	8%	Add FusionAccess platform O&M, 10% Update the FusionAccess features and management, 80%
13.Cloud Computing Trends	5%	5%	Update cloud computing trends, 80%

2. Lab Guides change instructions

In Word, each lab manual needs to Added a page of experiment manual knowledge point change instructions to introduce the knowledge change points (optimization, addition or deletion) of the experiment manual relative to the old lab manual.

Chapter	V5.0	V5.5	Change Instructions
1. Basic Exercises of Cloud Computing	20%	20%	Update storage experiment, 20%
2. Huawei FusionCompute Exercises	40%	40%	Update FusionCompute to 8.3.0 Add FusionCompute O&M experiment, 10% Update FusionCompute deployment experiment, 15% Update FusionCompute management experiment, 30%
3. Huawei FusionAccess Exercises	40%	40%	Add FusionAccess O&M experiment, 10% update FusionAccess deployment experiment, 20%

3. Test content change instructions

Chapter	V5.0	Chapter	V5.5	Change Instructions
1. General knowledge of cloud computing 1.1 Cloud Computing Basics 1.2 Server Basics 1.3 Storage Technology Basics 1.4 Network Technology Basics 1.5 Operating System Basics	26%	1. General knowledge of cloud computing 1.1 Cloud Computing Basics 1.2 Server Basics 1.3 Storage Technology Basics 1.4 Network Technology Basics 1.5 Operating System Basics	26%	/
2. Virtualization and	35%	2. Virtualization and	35%	Added FusionCompute platform O&M tests.

FusionCompute 2.1 Virtualization 2.2 Huawei Virtualization Platform 2.3 Huawei Virtualization Platform Management and Usage		FusionCompute 2.1 Virtualization 2.2 Huawei Virtualization Platform 2.3 Huawei Virtualization Platform Management and Usage		
3. Desktop cloud and FusionAccess 3.1 Overview of FusionAccess 3.2 Planning and Deployment of FusionAccess 3.3 Service Provisioning of FusionAccess 3.4 Features and Management of FusionAccess	35%	3. Desktop cloud and FusionAccess 3.1 Overview of FusionAccess 3.2 Planning and Deployment of FusionAccess 3.3 Service Provisioning of FusionAccess 3.4 Features and Management of FusionAccess	35%	Added FusionAccess desktop cloud O&M and deployment tests.
4. Cloud Computing Trends	4%	4. Cloud Computing Trends	4%	Optimized cloud computing development trend tests.
